SUMMARY

- Dedicated, hardworking and eager to further more challenge myself specifically in coding. I am open to adaptability, excellent at problem solving, whether at current job location or the online classes I am currently taking. I am working on expanding my knowledge and skills I can further utilize in my future career. I also have great interest in crypto currency and have taken time to learn to trade and work with different wallets and platforms. I am seeking the opportunity to sharpen my already obtained skills as well as become a master in Software Engineering.
